Characteristics (Points to be aware of)

- Reflected images may look distorted when viewing KomyMirror while moving or from a distance.
- By its nature, KomyMirror may have small scratches that do not affect visibility.
- Due to its special composition, KomyMirror is inferior in sharpness to a convex mirror. However, this does not affect visibility.
- In the direct rays of the sun or other light sources, KomyMirror may be difficult to look at depending on the angle.

Size of Image in Mirror

The larger the curvature radius, the larger the mirror image you can see.
